Solution for 5.5 Samurai (Answer = PROBST)

The first step is to obviously solve the samurai sudoku. Then from there, as the hint X marks the spot hints, you match the top left and bottom right sub-sudokus and see where the numbers are the same. You then do the same process to the other diagonal. Then starting with the first pair mentioned, you mark where the numbers are the same on the letter grid and take the corresponding letters. You need to take them in order of the numbers given, ie you need to take all the letters corresponding with matching 1's, then twos. Then do the same for the other diagonal. You should then get "name of the host from survivor", who is Jeff PROBST
