Solution for 2.5 Colour-Blind (Answer = CUSCO)

Decompose into Red, Green, Blue components and read the corresponding braille messages. For example, the top left corner (first 6 pieces that give first braille letter) decomposes into:

```
-GB  R--

R--  RGB

RGB  -GB
```

And taking the braille for each colour component:

```
. R     G .     B .

R R     . G     . B

R .     G G     B B
```

spells out the braille letters Z, T and Z respectively. Doing it for the whole grid spells:

```
Red:              Green:            Blue:

TWOTHREEZERO      ZEROZEROZERO      ZEROZEROZERO

TWOFIVETHREE      ONEFIVETHREE      ZEROZEROZERO

TWOFIVETHREE      TWOTHREEZERO      ZEROZEROZERO

ZEROSIXEIGHT      ONESEVENZERO      ONEZEROTHREE

ZEROFIVEZERO      ONETHREEFIVE      ONESEVENZERO

ZEROZEROZERO      ZEROSIXEIGHT      ONEFIVETHREE

ONEZEROTHREE      ZEROFIVEZERO      ONETHREEFIVE
```

So you get a flag with 7 colours, i.e.

- RGB(230,0,0)
- RGB(253,153,0)
- RGB(253,230,0)
- RGB(68,170,103)
- RGB(50,135,170)
- RGB(0,68,153)
- RGB(103,50,135)

This gives you a flag which, which though may be mistaken for a number of similar **Rainbow flags**, is distinct enough to be identified as the **flag of CUSCO**:
