

Solution for 3.3 Family Tree (Answer = PYTHAGORAS)

First consider the material about Anna's brother Phil and Wendy. A quick search for Phil and Wendy (with perhaps Democrat thrown in) should yield information about Phil and Wendy Gramm. So since Phil is Anna's brother, her name is Anna Gramm. So, we are looking to find an anagram of something. "Gary Haptos" is about all that is left in the puzzle. Conveniently, it is an anagram of Pythagoras.
