

Solution for 3.5 Advanced Warfare (Answer = BATTLELAB)

In order to destroy the enemy units, the weapons must be deployed as shown below:

 50HP	 50HP				 70HP		 75HP	
		 100HP	 55HP		 25HP		 50HP	
	 60HP			 55HP	 45HP			
			 60HP	 100HP				 50HP
		 60HP	 110HP					
						 50HP

Though the deployed weapon letters spell TABLES, this is not the intended answer. By writing the weapon's letter on each attacked square, the answer **BATTLELAB** appears in the third row.

Note: It was subsequently discovered that if the 45HP tank is shifted down one cell, no enemy units are overkilled and the solution is unique (i.e. it does not allow interchanging the Electron Cannon for the Stun Bomb)
