All answers are made from a set of 13 letters (CEFGHILNORTVW) and represent a particular card rank. The winners from each table allow you to deduce that W = 2, O = 3, L = 4, C = 5, V = 6, T = 7, H = 8, G = 9, I = Ten, E = Jack, N = Queen, R = King and F = Ace.

Finally, the leftmost letters from each word spell the phrase LEFT COL OF FREECELL ONE ONE NINE EIGHT TWO. This refers to the famous unsolvable Freecell game 11982 which has starting cards in the left column of A3KJ6JK. Decoding these using the above substitution then spells the answer **FOREVER**.
